Scan Report

May 31, 2024

Summary

This document reports on the results of an automatic security scan. All dates are displayed using the timezone "Coordinated Universal Time", which is abbreviated "UTC". The task was "project24.next-step.tn". The scan started at Fri May 31 19:14:05 2024 UTC and ended at Fri May 31 19:24:30 2024 UTC. The report first summarises the results found. Then, for each host, the report describes every issue found. Please consider the advice given in each description, in order to rectify the issue.

Contents

1   Result Overview

Host	High	Medium	Low	Log	False Positive
10.9.21.200	1	1	0	8	0
Total: 1	1	1	0	8	0

Vendor security updates are not trusted.
Overrides are off. Even when a result has an override, this report uses the actual threat of the result.
Information on overrides is included in the report.
Notes are included in the report.
This report might not show details of all issues that were found.
Issues with the threat level "High" are not shown.
Issues with the threat level "Medium" are not shown.
Issues with the threat level "Low" are not shown.
Issues with the threat level "Log" are not shown.
Issues with the threat level "Debug" are not shown.
Issues with the threat level "False Positive" are not shown.
Only results with a minimum QoD of 70 are shown.

This report contains results 1 to 10 of the 20 results selected by the filtering described above.
Before filtering there were 22 results.

2   Results per Host

2.1   10.9.21.200

general/tcp	Log
25/tcp	Log

2.1.1   High general/tcp

High (CVSS: 10.0)

NVT: Report outdated / end-of-life Scan Engine / Environment (local)

. . . continues on next page . . .

Summary
This script checks and reports an outdated or end-of-life scan engine for the following environments:
- Greenbone Community Edition
- Greenbone Enterprise TRIAL (formerly Greenbone Security Manager TRIAL / Greenbone Community Edition VM)
used for this scan.
NOTE: While this is not, in and of itself, a security vulnerability, a severity is reported to make you aware of a possible decreased scan coverage or missing detection of vulnerabilities on the target due to e.g.:
- missing functionalities
- missing bugfixes
- incompatibilities within the feed

Quality of Detection: 97

Vulnerability Detection Result
```
Version of installed component:          22.7.9 (Installed component: openvas-l
↪ibraries on OpenVAS <= 9, openvas-scanner on Greenbone Community Edition >= 10
↪)
Latest available openvas-scanner version: 23.0.1
Reference URL(s) for the latest available version: https://forum.greenbone.net/t
↪/greenbone-community-edition-22-4-stable-initial-release-2022-07-25/12638
```

Solution:
Solution type: VendorFix
Update to the latest available stable release for your scan environment. Please check the references for more information. If you're using packages provided by your Linux distribution please contact the maintainer of the used distribution / repository and request updated packages.
If you want to accept the risk of a possible decreased scan coverage or missing detection of vulnerabilities on the target you can set a global override for this script as described in the linked GSM manual.

2.1.2   Medium 25/tcp

Medium (CVSS: 4.8)
NVT: SMTP Unencrypted Cleartext Login

Summary
The remote host is running a SMTP server that allows cleartext logins over unencrypted connections.

Quality of Detection: 70

Vulnerability Detection Result
```
The remote SMTP server accepts logins via the following cleartext authentication
↪ mechanisms over unencrypted connections:
LOGIN
PLAIN
The remote SMTP server supports the 'STARTTLS' command but isn't enforcing the u
↪se of it for the cleartext authentication mechanisms.
```

Impact
An attacker can uncover login names and passwords by sniffing traffic to the SMTP server.

Solution:
Solution type: Mitigation
Enable SMTPS or enforce the connection via the 'STARTTLS' command. Please see the manual of the SMTP server for more information.

Vulnerability Detection Method
Evaluates from previously collected info if a non SMTPS enabled SMTP server is providing the 'PLAIN' or 'LOGIN' authentication methods without sending the 'STARTTLS' command first.

. . . continues on next page . . .

Details: `SMTP Unencrypted Cleartext Login` OID:1.3.6.1.4.1.25623.1.0.108530 Version used: `2023-10-13T05:06:09Z`

2.1.3   Log general/CPE-T

Log (CVSS: 0.0)

NVT: CPE Inventory

Summary
This routine uses information collected by other routines about CPE identities of operating systems, services and applications detected during the scan.
Note: Some CPEs for specific products might show up twice or more in the output. Background: After a product got renamed or a specific vendor was acquired by another one it might happen that a product gets a new CPE within the NVD CPE Dictionary but older entries are kept with the older CPE.

Quality of Detection: 80

Log (CVSS: 0.0)

NVT: OS Detection Consolidation and Reporting

Summary
This script consolidates the OS information detected by several VTs and tries to find the best matching OS.
Furthermore it reports all previously collected information leading to this best matching OS. It also reports possible additional information which might help to improve the OS detection.
If any of this information is wrong or could be improved please consider to report these to the referenced community forum.

Quality of Detection: 80

Vulnerability Detection Result
```
Best matching OS:
OS:          HP JetDirect
CPE:         cpe:/h:hp:jetdirect
Found by VT:  1.3.6.1.4.1.25623.1.0.102002 (Operating System (OS) Detection (ICM
↪P))
Concluded from ICMP based OS fingerprint
Setting key "Host/runs_unixoide" based on this information
```

Solution:

Log (CVSS: 0.0)
NVT: Services

Summary This plugin performs service detection.

Quality of Detection: 80

Vulnerability Detection Result
`An SMTP server is running on this port`
`Here is its banner :`
`220 mail.pfe2024-amen.nextstep-it.com ESMTP Postfix`

Solution:

Vulnerability Insight This plugin attempts to guess which service is running on the remote port(s). For instance, it searches for a web server which could listen on another port than 80 or 443 and makes this information available for other check routines.

Log Method Details: `Services` OID:1.3.6.1.4.1.25623.1.0.10330

Version used: 2023-06-14T05:05:19Z

Log (CVSS: 0.0)

NVT: SMTP Server type and version

Summary
This detects the SMTP Server's type and version by connecting to the server and processing the buffer received.

Quality of Detection: 80

Vulnerability Detection Result
```
Remote SMTP server banner:
220 mail.pfe2024-amen.nextstep-it.com ESMTP Postfix
The remote SMTP server is announcing the following available ESMTP commands (EHL
↪O response) via an unencrypted connection:
8BITMIME, AUTH LOGIN PLAIN, AUTH=LOGIN PLAIN, CHUNKING, DSN, ENHANCEDSTATUSCODES
↪, ETRN, PIPELINING, SIZE 10240000, STARTTLS, VRFY
```
